

Table of Contents

FOREWORD	8
HIGH-ALTITUDE COMMANDMENTS	9
PRE-EXPEDITION CHECKLIST	10
Medical Check-Up	10
Vaccinations	11
Dental Check	12
Insurance	12
Emergency Action Plan	13
Pre-Expedition Medical Training	13
Expedition First-Aid Kit	14
Physical Training	16
ACCLIMATIZATION	17
High-Altitude Conditions	17
The Golden Rules of Acclimatization - Trekking and Peaks up to 6000 m	17
Acclimatization Schedule: 4500 – 5000m	19
Acclimatization Schedule: Mont Blanc (4810m)	20
Acclimatization Schedule: Kazbek (5047m)	20
Acclimatization Schedule: 5500 – 6000m	21
Acclimatization Schedule: Mount Everest Base Camp (5350m)	21
Acclimatization Schedule: Elbrus (5642m)	22
Acclimatization Schedule: Kilimanjaro (5895m)	23
Acclimatization Schedule: Mount Meru (4565m) & Kilimanjaro (5895m)	23
Acclimatization on High Peaks (6,000–8,000 m)	24
Acclimatization Schedule: 6500 – 7000 m	24
Acclimatization Schedule: Aconcagua (6962m) – first option	25
Acclimatization Schedule: Aconcagua (6962m) – second option	25
Acclimatization Schedule: 7000-7500 m	26
Acclimatization Schedule: Lenin Peak (7134m)	27
Acclimatization Schedule: 8000-8500 m	27
Acclimatization Schedule: Makalu (8485m)	28
Acclimatization Schedule: Mount Everest (8848m) – oxygen supported	29
Pharmacological Prophylaxis	29
Pre-acclimatization	30
OXYGEN USE PROTOCOLS	31
Mount Everest	31
Summit Push Plan	31
Climbing Times Between Camps (from C3 on oxygen)	31
Oxygen Cylinder Capacity and Consumption	31
Summit Push – Optimal Oxygen Plan	32
Summary	33
Summit push – oxygen use plan – minimum plan	33
Kilimanjaro	33
ACUTE MOUNTAIN SICKNESS (AMS)	34
AMS - symptoms	34
Self-Assessment: Lake Louise AMS Score	35

AMS – Management	35
HIGH-ALTITUDE CEREBRAL EDEMA (HACE)	36
HACE – symptoms	36
Simple Field Tests to Suspect HACE	36
HACE – Management	37
HACE – a true story	38
HIGH ALTITUDE PULMONARY EDEMA (HAPE)	42
HAPE - Symptoms	42
How to Check for HAPE	42
HAPE - management	43
Using a Portable Hyperbaric Bag	43
HAPE – a true story	44
HYPOTHERMIA	48
How to Prevent Hypothermia	48
High-Altitude Environment	49
How the Body Loses Heat	49
Types of Hypothermia	49
Mild Hypothermia	49
Afterdrop – A Dangerous Phenomenon	50
Moderate Hypothermia	50
Severe Hypothermia	51
Hypothermia and High-Altitude Cerebral Edema (HACE)	51
FROSTBITE	52
Prevention	52
Foot Protection System (Tested in the Himalayas)	53
Facial Protection System	54
Symptoms of Frostbite	55
Stages of Frostbite	55
How to Reduce the Risk of Frostbite	56
Frostbite Treatment	57
Field Management	57
Treatment – Higher Camps	57
Treatment – Base Camp	57
Hospital Treatment	59
DEHYDRATION	60
Why Dehydration Is Common in the Mountains	60
Symptoms of Dehydration	61
Hydration and Blood at Altitude	61
Hydration System During Climbing	62
Preparing Water in Camp	63
Preventing Water From Freezing in a Hydration System	63
Nighttime Urination	64
Safe Drinking Water in the Mountains	64
NUTRITION	66
Energy Requirements in the Mountains	66
Energy During Climbing	66
Hygiene in Camp	67

TRAVELER’S DIARRHEA	68
What to Do in Case of Diarrhea	68
MOUNTAIN ACCIDENTS	69
Safety First	69
Be a Thoughtful Rescuer	69
Information to Provide to Rescue Services	69
Caring for the Injured	69
Preparing for Helicopter Landing	70
INJURIES	71
Wounds	71
Dislocations / Sprains	73
Fractures	74
Casualty Transport	75
SNOW BLINDNESS	81
How to Prevent Snow Blindness	81
Snow Blindness - Symptoms	82
Snow Blindness - Treatment	83
Recovery Time	83
Snow Blindness – a true story	84
SUNBURN	85
POLAR HANDS	86
Causes	86
How to prevent polar hands	87
How to treat painful cracks	87
Application instructions:	87
Why glue?	87
SLEEP AT HIGH ALTITUDE	88
Periodic Breathing	88
Why is Sleep Disturbed?	88
Practical Tips	88
Sleep-Aiding Medications	88
HIGH-ALTITUDE COUGH – LARYNGITIS AND THROAT IRRITATION	89
How to protect your airways:	89
Main symptom	89
CARBON MONOXIDE POISONING AT HIGH ALTITUDE	90
Epidemiology	90
Pathophysiology	91
Symptoms	91
Treatment	91
Carbon Monoxide Poisoning at High Altitude – a true story	92
CHILDREN IN THE MOUNTAINS	95
Preparation for the Trip	95
Safety Planning	95
Protecting Children in Mountain Conditions	96
Hiking Pace and Daily Needs	96
Altitude Illness in Children	96
Symptoms in Young Children	96

Risk Factors	96
Prevention and Treatment	97
WOMEN IN THE MOUNTAINS	98
Hygiene and Practical Tips	98
Menstruation at Altitude	99
Contraception in the Mountains	99
Pregnancy and Altitude	100
Altitude During Different Stages of Pregnancy	100
Physical Activity During Pregnancy	101
Summary	101
STROKE AT HIGH ALTITUDE	101
Risk Factors for Stroke at Altitude	101
Symptoms of Stroke at Altitude	101
Management in Suspected Stroke	102
Summary	102
I HAVE A MEDICAL CONDITION... CAN I GO ON A HIGH-ALTITUDE EXPEDITION?	103
Visit Your Doctor	103
Emergency Action Plan	103
Medical Insurance	103
Expedition Medical Kit and Medications	103
Inform the Organizer and Group	103
Train Your Companions	103
Health Information Card	103
Monitor Your Health During the Expedition	104
Allergies	104
RESPIRATORY DISEASES	104
Asthma	104
COPD – Chronic Obstructive Pulmonary Disease	105
Obstructive Sleep Apnea	106
Interstitial Lung Diseases	107
GASTROINTESTINAL DISEASES	107
Peptic Ulcer Disease	108
Chronic Inflammatory Bowel Diseases	108
Hemorrhoids	108
CARDIOVASCULAR DISEASES	109
Coronary Artery Disease / Myocardial Infarction	109
Heart Failure	111
Congenital Heart Defects	111
Hypertension	112
URINARY SYSTEM DISEASES	113
Urinary Bladder Infection	113
Benign Prostatic Enlargement	113
Kidney Failure	113
ENDOCRINE AND METABOLIC DISEASES	114
Diabetes	114
NEUROLOGICAL DISEASES	116
Epilepsy / Seizures	116

Migraine	117
Post-Stroke Condition	118
MENTAL HEALTH CONDITIONS	118
OPHTHALMIC DISEASES	119
Wearing Glasses and Contact Lenses in the Mountains	119
REFERENCES	120
